

U-Select® Excellence

Design and function in harmony

NEW!

PAUL WOLFF 

Discover the new U-Select® Excellence waste disposal column

An innovation of the successful Excellence line, extended by additional fractions, offers new possibilities and versatility. The waste disposal column combines an ergonomic and modern design made of high-quality stainless steel with an elegant, slim appearance and sets the highest standards in durability and ease of maintenance.

Your benefits at a glance

- Disposal for all fractions up to a volume of 80 litres
- Vertical filling and conical feed chute
- Effective drainage of water
- High-quality, corrosion-resistant stainless steel
- Ergonomic design facilitates use and operability

Innovative features for enhanced efficiency

U-Select® Excellence allows for disposal of all fractions with a volume of up to 80 litres and permits vertical filling of the underground depot container. The conical drop chute reduces the risk of blockages and operational disruptions, while effective drainage of water minimizes moisture buildup and unpleasant odors.

Focus on convenience and design

With a throw-in height of 90 cm, the disposal column enables barrier-free and convenient filling and smooth-running lid operation. The flowing product design and individual design options using coloring and foliation ensure an aesthetic appearance. The stainless-steel construction with laser-welded joints guarantees excellent workmanship and durability.

Note: Technical changes reserved.
